Box No. V **Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

## 1. Statement

Novelty (N)	Claims	1–12	YES
	Claims		NO
Inventive step (IS)	Claims	1–12	YES
	Claims		NO
Industrial applicability (IA)	Claims	1–12	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

Claims 1 to 12

The special technical feature of the inventions set forth in the present application (i.e., the structure for a pressure reduction valve that comprises a diaphragm, wherein the valve operating unit, which was configured by pre-assembling a guide member, a valve seat and a valve stem equipped with a valve element, is attached to the body in a manner such that one end of the valve stem protrudes from the valve hole and is detachably attached to the diaphragm rod while the other end of the valve shaft slidably engages with the guide hole) is not disclosed in any of the documents that are cited in the international search report, and would not have been obvious to a person skilled in the art.

Furthermore, the inventions set forth in claims 1 to 12 of the present application exhibit prominent effects in that it is possible to increase the ease of assembly while decreasing the costs associated therewith, and in that it is also possible to simplify the valve performance confirmation process while improving the yield of the production process as a result of the abovementioned special technical feature.
